

CS210 - DBMS

- 1) Error, As only 2 columns are there, we can't order by 3rd. (Error) ←

	Z Per Name	Z Per Id
2)	A	121
	B	113
	D	118
	E	119

2)

Employee Table.

emp_name	insurance_id
A	1
B	1
C	2

```
SELECT emp_name from employeeTable ;
GROUP BY insurance-id;
```

3		SELL
	sales volume	id.
	100 @	112
	200 @	213
	3000	216

SELECT sales volume FROM SELL
 ORDER BY sales volume DESC LIMIT 1,1
 O/P 2000 (2nd)

4 Yes SQL drops all objects, which are in a table like constraint, index, column. Dropping a table will not drop view & stored procedure as they are outside scope of table.

5) SELECT * FROM Std-info-Details
 WHERE Columnname % 2 = 0

(for even numbering)

19BCS091

RAVI SHANKAR S.

Date: / /

Page no: _____

6) SELECT* FROM UniversityTable
WHERE I=0

As $I=0$ is false, nothing will be generated.
No Table formed.

8)
